

Assignment 2

QUESTIONS

1. Learn how to use `<nav>` for menus/links. Create a navigation bar with internal links.
2. Understand the difference between sectioning content (`<section>`) and standalone content (`<article>`). Create examples.
3. Learn how `aside` is used for side content (ads, sidebars) and (`main` for primary content. Build a sample page.
4. Combine `<header>`, `<nav>`, `<main>`, `<section>`, `<article>`, `<aside>`, `<footer>` to create a complete webpage layout.

This Code cover all these questions

```
