

HTML And CSS Test

1. A college wants an online student registration page where students can enter personal details, select courses, and upload feedback. Create the webpage using semantic tags, form, tables, list, and CSS styling and apply flex concept.
2. Add headers to tables using `<th>`. Compare difference between `<td>` and `<th>` and then add group selector to group (table, tr, td) add color.
3. Create Website page using `Iframe`, `object`, `embed` and then CSS
4. Explain type of selector?
